Date of Evaluation

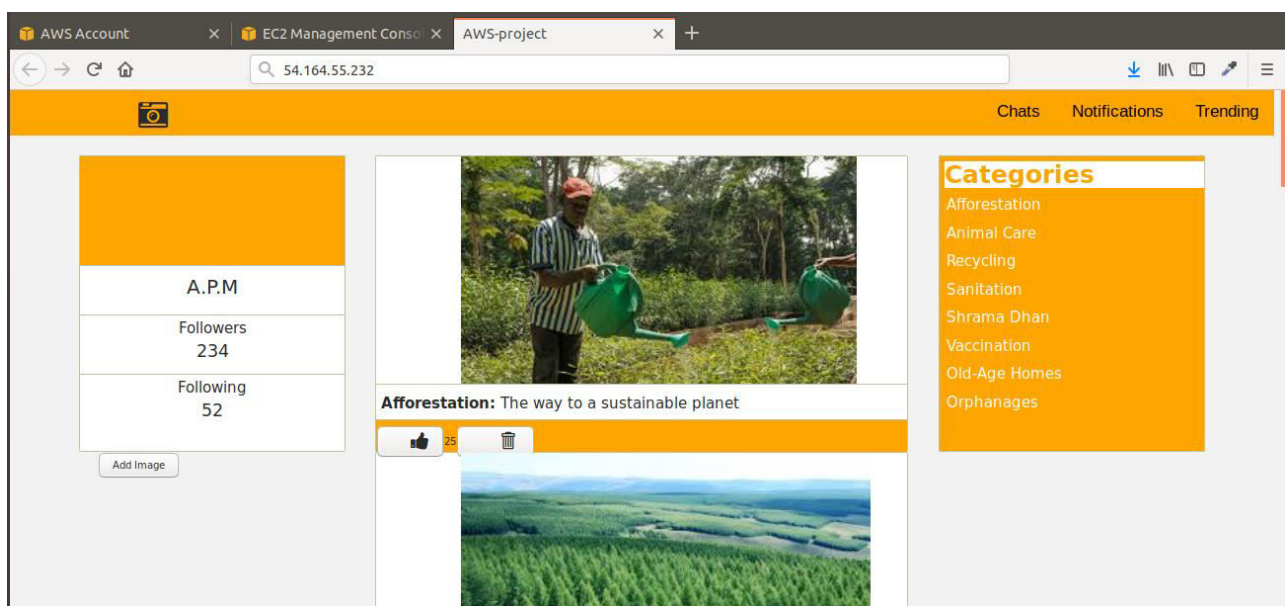

Evaluator

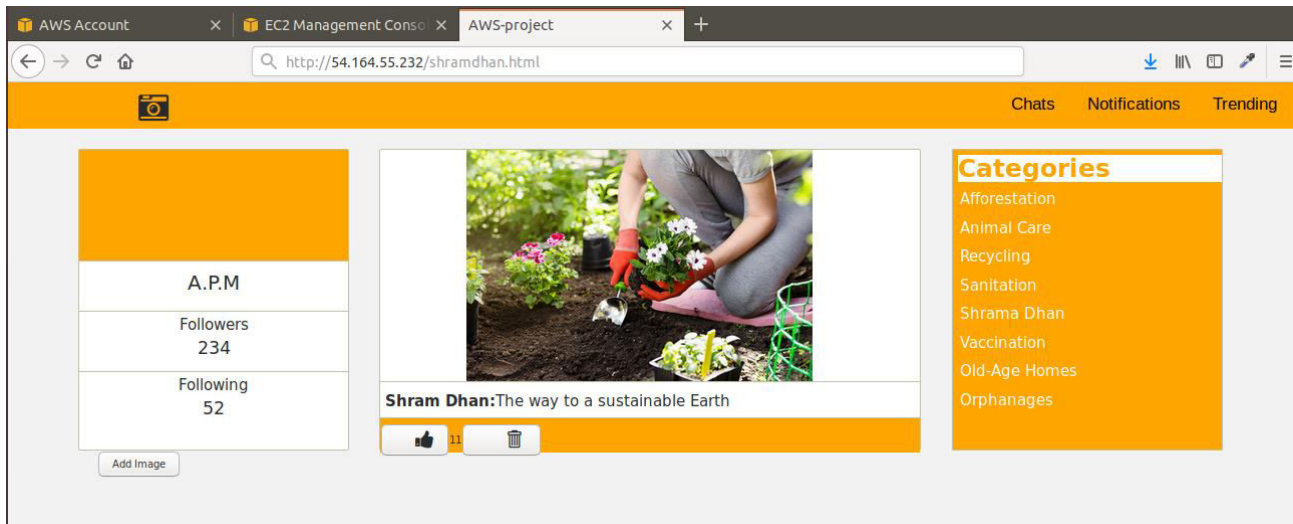

1. AWS username on which demo was shown
2. Public IP address of web server
3. Put a screenshot of your home page GUI

1) AWS Username: Abhinav Hegde

2) 54.164.55.232 (This Public Ipv4 Address changes everytime the instance is restarted, so there is a chance that the given IP Address would not work after a period of time)

3)

4. Summarize your learning as part of this assignment

- Learnt how to interact with AWS platform.
- Enabling Inbound traffic through the use of SSH and HTTP
- Creating instances on the cloud.
- Transferring the files that we have made on the local system to the instance on the cloud.
- Interactive Web designing using HTML,CSS,Bootstrap,Javascript and JQuery

Any other observations/challenges/comments

- The public Ipv4 address changes everytime the instance is restarted
- Setting up the instance on AWS for the very first time was a bit challenging
- Web Designing was time consuming
